01

FLUID BALANCE & OSMOTIC DRIVE

SODIUM [FROM SODIUM CITRATE & SODIUM CHLORIDE] 250 MG

Primary extracellular electrolyte responsible for driving fluid retention, plasma volume, and effective hydration.

POTASSIUM [FROM POTASSIUM CITRATE & POTASSIUM CHLORIDE] 450 MG

Primary intracellular electrolyte supporting cellular hydration, nerve signalling, and muscular contraction.

02

NEUROMUSCULAR FUNCTION & CRAMP REGULATION

MAGNESIUM [FROM MAGNESIUM MALATE] 65 MG

Supports neuromuscular signalling and muscle relaxation, helping reduce cramping and fatigue during prolonged activity.

TAURINE 1,000 MG

Regulates cellular hydration and calcium handling within muscle tissue, supporting endurance and muscular function.

03

TRACE ELECTROLYTE SUPPORT

COCONUT WATER POWDER 500 MG

Provides naturally occurring electrolytes and trace minerals that contribute to broader electrolyte availability and hydration support during physical activity.

PRODUCT CODE: PS-H01
PRODUCT NAME: Drench
SYSTEM CLASS: Class IV
SYSTEM TYPE: Performance Systems
