01 OMEGA-3 FATTY ACID PROFILE

TOTAL OMEGA-3 FATTY ACIDS — 1,944 MG

Provides a complete omega-3 fatty acid spectrum contributing to cardiovascular, neural, and systemic physiological function.

EPA [EICOSAPENTAENOIC ACID] — 1,216 MG

Regulates inflammatory balance, vascular function, and cellular signalling.

DHA [DOCOSAHEXAENOIC ACID] — 540 MG

Maintains neural membrane structure, cognitive function, and visual health.

DPA [DOCOSAPENTAENOIC ACID] — 58 MG

Maintains the intermediary omega-3 fraction that contributes to a complete marine lipid profile and contributes to the broader omega-3 metabolic pathway.

02 MARINE LIPID DELIVERY SYSTEM

MAG-O3® FISH OIL CONCENTRATE — 2,700 MG

Monoglyceride-based marine lipid delivery system engineered to enable efficient intestinal absorption and utilisation of omega-3 fatty acids compared with conventional triglyceride and ethyl-ester fish oils.

The MAG-O3 structure closely resembles the lipid form produced during digestion, enabling efficient uptake and consistent utilisation.

03 OXIDATIVE STABILITY & LIPID PRESERVATION

MIXED TOCOPHEROLS — N/A

Antioxidant protection that helps stabilise marine lipids and reduce oxidative degradation.

ROSEMARY EXTRACT — N/A

Maintains lipid stability and preservation of omega-3 integrity throughout storage and use.

PRODUCT CODE:	LS-L01
PRODUCT NAME:	Omega^3
SYSTEM CLASS:	Class I
SYSTEM TYPE:	Life Support Systems
